

FOR IMMEDIATE RELEASE

**DATA PROTECTION SUMMIT 2008 AWARDS BEST OF SHOW HONORS TO
SAFEND, CORE SECURITY TECHNOLOGIES, AND REFLEX SECURITY**

**Awards Recognize Innovative Technology and How it is Being Used
in the Marketplace**

March 13, 2008, Irvine, Calif. – The Data Protection Summit 2008 announced the recipients of its second annual Best of Show Awards, the premier opportunity for industry recognition of innovative technology and how it is being used in the marketplace. Awards were presented to Safend, Core Security Technologies, and Reflex Security. The awards were judged based on distinctiveness of the application, technology, or product; central use of data protection as a solution; and technical and business significance.

“With an impressive list of award nominations, the judges had a very challenging job of selecting the most innovative technology, application, and end-user solution,” said Jay Kramer, Vice President of Worldwide Marketing, iStor Networks, and Chairperson of the Data Protection Summit Awards Committee. “These 2008 Best of Show Award Winners truly represent the highest levels of excellence in data protection technology.”

Winners were announced at a special ceremony at the Data Protection Summit on Wednesday, March 12:

- Most Innovative Data Protection Application – Safend, for Safend Protector
- Most Innovative Data Protection Technology – Core Security Technologies, for CORE IMPACT
- Most Innovative Data Protection End-User Solution – Reflex Security, for Virtual Security Appliance

About Data Protection Summit

The 2nd annual Data Protection Summit is designed to provide attendees with practical information on the current state of data protection. The Summit will include half-day tutorials on data security, compliance, mobile security, and legal issues and privacy; presentations on security, privacy, and data protection; and keynotes and panel discussions by industry luminaries. The Summit is open to everyone involved in the design, development, integration, marketing, use, or support of products, hardware, or software related to data protection.
